

Terminal Exercise

YELLOW CUP!

1. Navigate to your desktop
2. Navigate to your home (~) directory
3. Navigate to ~/desktop
4. Create a directory called cli-test
5. Create a file called test.txt inside of cli-test
6. Delete the test.txt file
7. Create a directory called sub-test inside the cli-test folder
8. Navigate inside of sub-test
9. Create a new file called hello.txt
10. Move the file outside of sub-test, directly inside cli-test (next to sub-test directory)
11. Confirm the file was moved to the correct place
12. Rename hello.txt to hi.txt
13. Open the file and edit in Nano with the following commands... nano hi.txt type any message at this point
ctrl + o (saves the change) enter (confirms the name of the file) ctrl + x (exits Nano)
14. View the contents of the file from the terminal
15. Create a file called .hidden inside cli-test
16. Try to view the file with ls
17. View the file with ls -a
18. Navigate to your desktop and delete the cli-test folder
19. Create an empty cli-test directory again
20. Repeat all of the above steps WITHOUT using the Terminal and only using IntelliJ
